Portfolio: kpegeder.github.io

Full Stack Web Developer with a background in Engineering and life-long dedication to learning. Effective at working with a team and problem solving to develop user-friendly applications. Known as a hard worker and driven to create in-depth successful apps, with a simple and clean appearance.

TECHNICAL SKILLS

LANGUAGES: HTML, CSS, JavaScript, jQuery, Bootstrap, Node.js, git,

APPLICATIONS: APIs, GitHub

PROJECT

AirWalk, GitHub - https://bit.ly/2F4ulvo, Deployed Project - https://bit.ly/2Z3Z4zT

- Create an app to allow a user to search for hikes in a location. Based on the user input, a list of hikes will be populated along with weather forecast, air quality, and directions to the hike.
- A team member and I were responsible to work on the backend using JavaScript to create a filtered list of hikes that fit the user input, and then display the information to the webpage.
- Languages: JavaScript, jQuery, CSS, HTML
